## **Introduction**

My name is [Kramer Wetzel](#), and I have been in this career for close to 20 years now, and I have been doing variations of this lecture/workshop most of that time. One of the things that is so much fun is I had the chance to fine tune this material. The first time I did this was about 1994, so a version of this material has been floating around that long.

I call this [BareFoot Astrology](#), you will learn, I am barefoot right now, I want you to take your shoes off -- get comfortable -- we are going to go stomping through the signs, and we are going to try to get some material to work with, something to hold onto.

We are talking about Scorpio's, we are talking about Leo's, talking about Gemini. What does that mean and what are some of the characteristics of each one of those signs?

When I want to address a particular sign, and this is foremost in my mind right now, I have a client, she's not an Aries but she's got four or five planets in her first house. So she claims another sign, but she responds like an Aries, and she behaves like an Aries. It's like she has Aries kind of direct attitude. It's refreshing.

Once you know her astrology it makes it real easy to deal with her, because I just treat her as if she were an Aries, and it makes it easy to get along with her instead of her sign really is.

What I am talking about.

I want to go through all 12 signs right now, go all the way through the cycle and explain each sign, give you some approximate dates when they start, talk about their element, talk about their quality and then one of the things that I like to do is talk about dating, because I have dated them all. Then we are going to talk a little bit about how they solve problems.

That is important, everybody talks about, "They are this," and "they're that," and they are all these lovely sorts of things.

What happens when somebody is face to face with a fixed object right in front of them that won't move ... that is a very important clue on how to solve their problems.

That is the way that I work with this.

## **Aries**

The first sign we are going to deal with is Aries. Aries is a cardinal sign, it's associated with the planet Mars and it's a Fire sign. Aries is ... the symbol for it is the Ram, got the ram's horn for the symbol, makes it really easy to draw.

Aries begins in the spring time, it's the beginning of the astrological cycle.

As a matter of fact, today the Sun is in Aries and the moon is in Aries, today is the astrological New Year for this year. We just passed the spring equinox, that's when Aries officially begins, and for astrological year it starts now.

With the Aries, it's a spring time symbol, it's a very fertile sign. It's spring time, it's when things start to grow, it's when everything starts to happen. I love Aries, they are really easy for me to get along with. Aries women are awesome, all you have to do is lick their neck and their pants fall right off. Okay, that's worked before, too, but that's a whole other story.

I also like dating Aries because they are very direct, I have one example of an Aries who has the ability to lie, but most of them have just a complete inability to lie. This one particular Aries, even though he tries to lie, he's not very good at it, and it sort of telegraphs and that is a typical quality for an Aries.

They are not all like that, but it's a fairly typical Aries quality, the inability to lie. They also usually can't see anything more than what's right in front of them. They are going to deal with the issue that is right here.

They are going to deal with what's right here.

They often can't think past the next five minutes.

One of my Aries clients, he gave me this material that I have been every so grateful for. He said, "I was born March 20 so I'm a Pisces, right?"

– no, you're an Aries. (I did the chart. Aries. No question.)

"But I'm March 20, that's Pisces right?"

– no, you're an Aries.

"But it's March 20, that would be Pisces, right?"

– no, he's an Aries.

March 20, if you were a Pisces, you would have said no I'm an Aires and wouldn't have gone on to fight about it, that's the typical Aires thing. They get onto one thing and they won't let go. They are accused of being stubborn, they are not stubborn – they just cannot see anything else.

They do what's right in front of them. I have an uncle who's an Aires, he's a retired surgeon. It's a perfect example of what an

Aires can do, he heals. Okay, it's a very healing sign if it's used properly. Once again, with a surgeon you have to use it properly.

When I talk about things like cardinal, fixed and immutable, those are qualities that each sign has. Each quality represents a certain type of energy. In the case of cardinal, which is what we are dealing with, with our Aires, it's a start-up energy. They got to get up and go, sometimes they lack follow through, although if you tell any Aires that, they always get upset.

I know how to follow through – what were we talking about?

I can't make this stuff up. I've always liked Aires women because they are particularly easy to get along with, for me. If you ask them a question and they answer "yes" they mean "yes." If you ask them a question and they answer "no" they mean "no." If you ask them a question and they say "maybe," it means we do not have enough information to draw a conclusion at this time.

I don't want you to think I'm bitter but most of the women I've dated? If you ask them a question if they say "yes" they mean "no," if they say "no" they mean "yes," if they say "maybe" it's like "guess, you fool" and you aren't going to guess the right answer are you, because no matter what I guess it will be wrong.

That makes Aires entirely refreshing, for me. We were talking about the blue door picture. The blue door picture was taken by

an Aires photographer, who was at the time really in love with me.

Also, short attention span, she found somebody else. That's okay, I'm good with that.

The Aires, one of the ways I describe the signs we have is how we deal with a brick wall. Let's say there is a brick wall right here. Okay.

In Aries, it's symbol is the Ram, what they are going to do is they are going to lower those ram horns and they are going to go crashing right into the brick wall ... they are not going to look at the left, they are not going to look at the right, they are just going to take it head on.

They are going to go wham, right into it, and not even think about it. They are just going to sit there and banging their forehead against that brick wall, until the brick wall eventually caves in.

The color I always associate with Aires is going to be bright-bright red, this could be a fairly Aires shirt, as a matter of fact, just an example. I also think of a fairly hot salsa, the Mexican sauce, when I think of Aires that is fairly typical of them, too.

## Taurus

The next sign we are going to go to is going to be Taurus.

Taurus is entirely differently, it's a fixed sign it's an earth sign and I associate it with the second house. The first house for Aires is basically the house that says, "This is me, here I am, this is who I am."

The first house is all about who you are, your basic person. The second house when we get to Taurus is all about the stuff, the stuff we use defines. The kind of computer that I use, the kind of wrist watch that I wear, the kind of shoes that I don't wear – that is for barefoot astrology, I'm not wearing shoes – that sort of thing.

It's a matter of ... the things that we define us, it doesn't have to be expensive stuff. Very frequently Taurus' are accused of being materialistic. They are not materialistic, what they are associated with is -- they want to know about stability.

Stability is very important.

We will find a lot of Taurus' on these charts, a conglomeration of planets and the Taurus house, the second house. I find somebody who is interested in stability.

Now, I got stalked by a Taurus. I love telling the story. It took her three years to catch me. I'm a guy, how long does it take to catch us – 30 seconds (if that long.) The Taurus did a

background check on me, a credit check, ran my numbers, learned the gate code to get in. Didn't show up on my doorstep but kept walking by the front of the door, just checking me out.

That's a Taurus way of doing things ... three years, "Oh, alright."

I had long since forgotten about her and moved on, and then it's like "oh yeah I'm interested in you." Okay. Where do we go from here?

Twice now I have been seduced by Taurus girls, twice now, actually three times. I have had this problem where their idea of foreplay is 24 hours and that is moving pretty fast for a Taurus.

The first time, back in East Austin, one time overseas – we were necking suddenly my shirt is gone. I guess that's a payback for high school, and then second time – then my pants are around my ankles. And the first time she said, "Alright we will finish this tomorrow."

The first time I tried to chase her out the door with my pants around my ankles, I almost fell flat on my face.

The second time, I am going, "I have seen this before and I am not going to chase you out the door because you will be back," and she did come back 24 hours later, and we completed what she started.

The other problem with the whole foreplay thing with them it's like, "okay now we get out the ostrich feathers," what's coming next, the whole chicken? I'm, "like wake me up when you guys are ready," they just keep going and going and going – very sensual.

I was kind of shocked from a Taurus girl, she taught me how to go into a store, and feel the fabric itself.

I'm a guy, it says L that's my size, I'm good to go. I think I like this color, I don't care if I like it or not, I'm not going to look at it, you all are going to have to look at it. It doesn't affect me. But the Taurus will touch it, very tactful, which is also very fun as a lover, a very-very sensual sign.

You have to remember they are not quick to make a decision, I did say that on my decisions, I said they are not quick about it, they want to stop and assess matters before they move forward.

Their planet is Venus, this is Venus, it's all about pleasure. The flavor that I associate with Taurus is going to be mint chocolate. Most Taurus', I'll be sitting here and I will have a Taurus girl in front of me and I will say, do you have any food in your purse. They will say no I don't have any food in my purse. I will say look and see. Well, okay I have some gum, some breath mints, and this half sandwich leftover, I have part of a candy bar right here. That to me qualifies as food, what it is they are worried about what happens if there is a drought or we are stuck on the

side of the road someplace and we don't have any food then we have something to work with.

That is how their orientation works – makes sense. Now the Taurus the often considered on what they are going to do, this is a very sensual sign. They take one look at that Aries banging their head into it, what they are going to do is say that looks like that hurts. And what they are going to do is put some green drapes on it and then they are going to get a chaise lounge so someone can serve them bon bon's and chocolate and champagne. Alright they get a light beer and a Hershey bar and its patio furniture but who cares. They are not going to hurt themselves.

## Gemini

The next sign is going to be Gemini. How I love my little Gemini girls. I was chasing after three of them at one time, they all had blonde hair and blue eyes. “This is for that one special one with blonde hair and blue eyes,” one was in Dallas, one was in San Angelo, it was great – they weren’t all in the same town it worked out just fine for me.

I didn’t win any of them but that is completely irrelevant now.

I always like dating a Gemini, it’s the sign of the twins, it’s associated with the third house. The third house has to do with communication and its planet is Mercury. [Mercury is retrograde](#) right now, that’s why we have had problems with technology today.

I also predicted there would be problems with technology today, said I am not going to worry about it, we are going to muddle through this material.

Now, with Gemini’s and Mercury, Mercury goes around the sun every 88 days, it moves very, very quick, you have to remember that because a Gemini brain moves very-very quick. That’s why I like the Gemini’s. If you want to catch a Gemini all you have to do is dangle a little bit of intellectual bait out there and they just chomp on it.

The easiest way to catch Gemini is through their brain, unlike any other sign. You catch them with their brain, and if you got their brain the whole rest of them will follow, they will follow you anywhere.

In my place in Austin, I unpacked all my books and put them up on bookshelves because they were all in boxes – I had been moving around a lot at the time, and I unpacked them all because I wanted to catch this one Gemini. The good news is, I got her in bed. Well, she got in bed so she could read all the titles.

A fairly typical Gemini, as far as that one went, anyway a fairly typical Gemini would read the title but not actually read the book. She wanted to see which books were there. To see if I had read anything that would be of importance to her. That's the way the Gemini works.

I have a buddy of mine who's a Gemini and he was working at Dell at the time, he would be coming over after work one day and I talked to him for 40 minutes while he drove down from Dell to my place in South Austin. I talked to him and he would hang up in the parking lot of the trailer park and until he got in the door, that's 20 seconds okay. He would have thought of 43 more things that he has to tell me about.

He would enter and it was like he was talking all over again, it's like what did you do the last 40 minutes. They are all about

communication. Every once in a while you will run into a silent Gemini, but most of them like to talk. The silent Gemini are a little bit scary because you can see the brain working, it's taking over.

I love Gemini's, I love dating Gemini. Gemini is one of the best thing for Sagittarius. I don't know why. I have a couple of Gemini that are involved in long term committed relationships with Sagittarius' and it seems to work really-really well. If you get a good one, it's great.

The deal with the Gemini, it's like dating a ménage, it's like an entertainment zone because they change. This is important, no this is important, no this is important and it's like make up your mind.

Looking at a Gemini, it's like looking into a finely cut gemstone, because on the inside the Gemini says I'm the same all the way through, it's just me. But we are never sure which facet we are looking at.

When Mercury goes retrograde, all hell breaks loose with my little Gemini. I have a Gemini sister and she is a perfect example. She has a degree in biomedical engineering. She works as a clown, and I don't even see how those are connected.

Now, when Mercury goes retrograde, I have learned a lot from my sister about how to deal with Mercury retrograde, too. She will have these blank books and journals, and they cost like

three bucks and when I will find them on sale I would buy a couple of those and give them to her at Christmas time and when Mercury goes retrograde, she will fill them up with ideas.

Ideas, paste things in, part scrap book, part that she had drawn a picture – I started doing that, too, when Mercury goes retrograde. Because what I do is I catch her ideas. It's a great time to brainstorm.

Now I will sort through my material after I get done with Mercury retrograde, this is good, this sucks, this is good, this sucks, this sucks – oh look at this one, that's great. They are not all good. As a matter of fact 80 percent is going to be crap, but you get used to it.

It's not all bad, it works out real well in the long run, if you work with the flow of Mercury instead of trying to work against it.

A great time to brainstorm, not always a good time for technology, I don't suggest defining technology at this time. There is one person I know who is really successful, but she had to buy a new computer and Mercury was retrograde but she had to get it right now. Okay. Nothing else would work so she went out and bought it.

That thing went on sale three weeks later when Mercury went direct, and she took it back and receipt back and they just gave her the change. The difference, gave her the sale price. It doesn't

always work like that but that is one of the things that can happen.

That computer I had has since blown up, too, because it was a Mercury retrograde computer. My truck used to leak, the radiator used to leak on my truck when Mercury was retrograde, it was the only time I would have problems with that radiator.

I would just park the truck, I wouldn't go anywhere, it was easier. I am not going to fight with this stuff, and that is one of those things. I couldn't have asked for a better metaphor.

Now with Gemini's realize they are going to start here and they go here and they go here and here and here. They are all over the mark. It's because their brain moves so fast, their brain moves probably three times faster than anybody else's brain.

That's the good news, appreciate that. It's an immutable sign and it's an air sign. They are colossal flakes. Appreciate them for what they can do. They will shoot out the ideas and sometimes do something with them.

Another example I use for my sister, she lives in California and she had this beautiful rent controlled apartment, I loved this place it was beautiful, two bedroom apartment in an ideal location. It's about a quarter mile from one of the big fault lines and she had a garage. The garage was crammed full of half finished crap. Projects she had started and never finished, she just threw it in the garage.

We had to park six blocks away one time because she couldn't pull her car into the garage and street parking is one of those things in California where it's a big deal. So that's an example, they don't always finish things up, but they collect a lot of little itchy-bitsy pieces all over the place.

You get more out of one of them if you just – use their brain. They are perhaps one of the most entertaining there are, sometimes they don't stop talking. But that's a different issue.

When they come up to brick walls, they are going to try 43 different things to get through that brick wall. Remember how those things work, they are going to get bored and move on and go do something else. They are not real good at problem resolution.

## Cancer

The next time we are going to come to is going to be Cancer.

The next one we are going to come to is going to be Cancer.

Cancer is a water sign, it's associated with the fourth house, it is a cardinal sign and it's also associated with the moon. In traditional astrology they say that it is ruled by the moon, and ruled by gives a certain patriarchal flavor to astrology that I don't like anymore.

I say it's associated with rather than ruled by, because I try to get away from that whole patriarch thing. Don't get me wrong, I'm a sexist pig. Patriarchy is on its way out but I am going to hold onto what few shards of dignity I have left while it's still there.

Now, with Cancer, I have a personal problem. Instead of pretending to be, I'm completely objective, because I'm not, I'm a Sagittarius. I have passions and appetites and that defines me, and I also have prejudices and that defines me, too.

I am not real fond of Cancer now, it's a personal thing. I have had Cancer attitude for a long-long time and I had a nasty separation, a bad divorce, left a bad taste in my mouth. I'm still in contact with this guy but we don't do a lot now. Cancer men and Cancer women are completely different, because Cancer with the water and the moon and the cardinality – cardinal nature of it. They are very-very feminine, great-great women. Love them as women, the men if they haven't done something to

become comfortable with their female side, they are a pain in the ass.

When I say comfortable with their female side, they don't have to go around, how do you know they're guys or whatever it is. They have to arrive at some point inside where they are comfortable with it.

We are looking at a Capricorn guy one time and I said they have such beautiful eyes. Capricorn guys usually have some of the prettiest eyes out of the whole zodiac. My Cancer guy who was not familiar with the way I work said, have you started to bat for the other team? No, I'm just saying the guy's got real nice eyes.

It's like why is this a problem? No, I'm not – I haven't changed, I think they're pretty. You have to be comfortable with this stuff, and that is part of what's important about it. Cancer guys who aren't comfortable with it. The guy was up and down because every time I would see him it would be like hey how are you doing – shake his hand and you could see that he wanted to hug me, but guys don't hug guys because he's not comfortable with guys hugging guys unless you are in a certain part of Dallas and that sends entirely the wrong message. We are not going to play that game right now, and he didn't want to play with that.

You could see that he was a little convoluted and conflicted. Those are the Cancer guys that I have problems with. Like I said, it's a very feminine sign.

Now, Cancer women, love Cancer women. Although there was a Cancer woman who once looked at me and said well if you don't know what you did wrong, I'm not going to tell you. I started looking around said is there a camera in here. Somebody going to bust out and say you've been punk'd. If you don't know what you did wrong I'm not going to tell you. How am I supposed to do that?

Alright, Cancer the sign is the Crab. We are going to go back down to the beach, one more time and we are going to watch the little crabs down there. They move sideways, they never move head on. They symbol for Cancer is going to be two little crab claws like that.

I have two fishing stories, one is actually New Year's we were down at the beach and we were watching sand crabs and they move sideways, so when they come up against the obstacles in life, what they are going to do is they are going to move sideways, they are going to go up one side and down the other. They are not going to take it head on.

Back to my editor, he one time cut a big old piece out of my column and I said what did you do. He said it's really good work Kramer and I'm going to save it for later, but it doesn't go with the flow of the article right now and I really don't want to use it in this particular setting. I've got to save this and I will plug it in when it's appropriate. Instead of just saying its junk I cut it and tossed it, which is what he did.

Actually he's Cancer, he might have saved all that stuff, but I am glad he was really nice and gentle with me, the artist, but it's also they have a way of being indirect about it.

Cancer women do not have that problem with severe feminine, they will just embrace it. Oh I'm sorry, I cut it, it was junk.

Now we are going to go back to the beach, one of the things you have to watch out for with Cancer, is that cardinal energy that they have, and this has happened in the last year. We were fishing and I had a little piece of shrimp on the end of a line. The cork started to move off, so I started reeling it in and it didn't feel like a fish, it felt like there was something there, like seaweed. What there was, there was a crab, a blue crab and he was holding onto that bait, pulling himself up and taking a bit and holding onto it. I reeled him all the way inside the boat. It was a female crab, we threw it back in the water and she was pregnant.

But she held onto that thing all the way to the boat, and in the boat, she was looking up at us going snap, snap, snap – I could step on you, but you know that's not going to accomplish anything.

When they get their claws on something they will hold onto it and not let go. That's one of the things to watch for with Cancer.

## Leo

The next sign we are going to come to is going to be my favorite sign – it's the Leo. In my horoscopes you will see it says Sagittarius, Gemini, the Leo, not a Leo ... The Leo. It's easier to approach them that way.

When I work with psychic figures, I am working physical expos, and you see me on my knees at my table talking to somebody – there's a lot of Leo in that chart, period. It's the easiest way to deal with them. I start on my knees and everything works out just fine. As long as I am on my knees we are going to get along just fine.

It's a fixed sign, it's a fire sign, but it's fixed. It's associated with the fifth house. The fifth house is the creative house, alright. If you are looking for somebody's creativity and how they are going to express themselves, you look in the fifth house.

Now, with the Leo, one of the things – I have been in this business for a while now, so I have seen between the ages of 34 I will get these Leos that come to me and they have chronic ailments and they are not happy and their life is in the toilet, they are making money but they are not enjoying their job.

What do you do – I'm an accountant. Ew, and you are frustrated – how did you know, you're a Leo okay. It's very simple, when I find a Leo, there has to be a creative outlet. I don't care what the

creative outlet is, there has to be some creative outlet of some kind. It can be anywhere of a number of different projects.

My father used – my father was very creative in his own right, but his idea of being creative was on his own spreadsheet. I'm sorry that doesn't strike me as being particularly creative, but there I go thinking twice about this and trying to estimate it.

When it comes to Leo creativity, I am not going to try to say you have to do this or you have to do that. There is a number of different ways to express itself. Find what works best for you, but they have to be creative in some capacity.

The reason I am on my knees for a Leo, if you treat a Leo well they will do anything for you. I mean anything. They will stop a speeding bullet, that is not bad at all, but you have to treat them well first. You cannot be false with them, lie to a Leo you're screwed. Just simply put.

I don't know, I guess that is not a polite way to put it, but I don't know how else to express the energy.

With the Leos, I stayed with some Leos out in El Paso, and her husband would just get so upset with me, because man it's just miserable after you leave here. Why? Because you always call her The Leo, she goes around the next week saying I'm The Leo.

It's easier for me though, I get curbside service and I get catered to, I start out by being nice though. Remember, do something nice for them, they will do anything for you – it doesn't have to be a lot, but you have to show some sort of – you have to do something.

Now, the planet that is associated with Leo is not a planet, but a star, it's the Sun. Everything in the solar system rotates around the Sun. So if you just think about that when you are thinking about the Leos, it makes it a whole lot easier to deal with them.

If you ask nicely they will do anything, honey nobody can take out the trash like you – there she goes, okay. Hey take out the trash – I don't think so ... two completely different ways of dealing with it.

I learned something dealing with Leos, one of the things I discovered that is really good is Wal-Mart flowers. This is one of my little secrets, okay. Wal-Mart flowers, you go to Wal-Mart and get the – I go about once every other week, and I get the cheap flowers that are about dead, they have been marked down from ten dollars, five dollars to two dollars. Chop the bottoms off them throw them in some cold water, throw a little salt in there and they will perk up. Sometimes quickly and sometimes they will last between two days and two weeks.

Those fresh flowers go a lot further than anything else, it's not a big gesture, it cost me two dollars alright, that is not a big deal.

But that works better than anything else. Aw look, he tried. Now you got the two dollars flowers, and it's not the amount of money that is spent, it's the way the resources are allocated.

When Leos come up with against brick walls in life, their symbol is the mane. Okay the lion's mane. And when Leos come up against the brick walls in life what they do is they sit right there and say there is a brick wall here, somebody better get here and get this out of my way, right now. I will not tolerate this.

## Virgo

The next sign is Virgo. I get along, I have dated more Virgo women than any other sign, don't ask me why – I will tell you why and we will figure it out I'm sure.

The symbol for Virgo is the little N with its leg crossed. If you dig into the actual symbolism there, that's female genitalia. The sign is the Virgin, and most of them are quite virginal in appearance. It's the archetype for the Virgo, the librarian with a little high lace collar on and all the Victorian underwear on, the Victoria's secret underwear on underneath it.

You are not going to see that until you get private and the door is shut and locked, and the blinds are drawn. And when that happens then it comes out. They have all sorts of hardware that drops out of the ceiling and you know – whips and chains, whatever it is, and restraining devices. I have never figured out the restraining devices – do I tie her up or does she tie me up, I don't remember.

Okay, anyway, Virgos are a lot of fun, it's the extra-sensual sign because it's an earth sign. Okay, it's also immutable sign, it's the least mutable of the immutable signs but it is mutable. And they can change direction. Not particularly quickly but they can change direction.

Every once in a while you are going to run into what I call the slut Virgo. I'm a Virgo but I'm not really Virgo like, why –

because they are busy doing every animal, mineral, vegetable that moves, they want to hop on top of it.

There are a few of those and you will encounter them from time to time, it's not bad they are just going against the very nature – actually, my favorite is a 1965 Virgo right now. Charlie Sheen.

He's kind of gone by the wayside, he's not really sucking a lot of bandwidth and that's good, anyway he's a '65 Virgo. That is one of the Virgos trying to be a slut Virgo – whatever works right.

That also speaks to some of their kinks. Now, I have a Virgo accountant, very glad I have a Virgo I've been audited twice so far, and both times it came back alright we're not going to audit you anymore because we can't find anything wrong with this.

There are certain things that we want done perfectly, my taxes would be one of the things I want done perfectly, no red flag – what do you do, I'm an astrologer. Okay let's bring in this guy. And they decide maybe they don't want to do that after all.

With Virgos, back when I was living in east Austin, I was dating this one Virgo and I floated her the keys to my place while I was gone. When I came home you could have done surgery in the bathroom. She threw away, wiped out half my stuff, replaced my toothbrush – I kind of liked that toothbrush, it was only two three years old, wasn't worn out yet.

That's a fairly typical Virgo thing, they come in and they clean. That same Virgo when I was dating her for a little while, I'd always carry a bottle of water. I'd do the clumsy Sagittarius thing and then she would see me down there cleaning up – it's water, it's not going to hurt anything.

Virgo's when they come up against the brick walls in life, what they are going to do with that brick wall is they are going to take it part gram sand by gram sand until – and mark each one so they can reassemble it correctly when they get on the other side of it. But they are also going to sit there and muddle the whole thing – who put this here, why is this wall here and look for who we need to blame for this. We always have to find somebody to hang the blame on.

That is one problem with Virgos, but they are so sensual and kinky. They really are.

## Libra

The next sign is Libra.

The next sign is Libra, love me my Libras. Libra is the first sign that comes above, the symbol for Libra is going to be the Scales. Libra starts on the fall equinox in the northern hemisphere. The fall equinox is when we have an equal amount of day and night. Between September 20 and September 23 and with the fall equinox, the beginning of Libra – Libra is an air sign, it's a cardinal sign and its planet is going to be Venus.

Wait a minute, you had Venus down here for Taurus. This is a completely different Venus that we are using up here for Libra. This Venus is all about taste and I am married to a Libra right now, I have seen this happen. She comes out, does this outfit look good, yeah, you look fine, let's go.

She goes back in and changes. How about this outfit – yep looks fine, I like the scarf, let's go. Changes, third time comes out different outfit, how about this – I just grin and say yeah, sure. Because apparently my opinion isn't worth anything, and then she goes and says you don't like anything do you. And the fourth time she comes out wearing what she was wearing the first time.

I have a couple women here and you guys go well it's important. So obviously you don't understand, obviously I don't. I love

dating Libras because they are fun to torture, and I don't mean torture in a conventional sense.

It's the sign of the Scales. They are all about finding peace and harmony. Everybody says they are balanced, they are not balanced. They come into this lifetime seeking balance, that's what they are looking for is that kind of balance.

That is why they are so much fun to torture – where do you want to go eat tonight, honey? Oh I don't know you decide. Okay, how about ... oh I was thinking BBQ. I have two lawyers here in town, both Libras, and one of them I am particularly fond of this guy, he has a lot of Libra in his chart.

I took a problem to him, and he looked it over, looked through the problem. I had a consultation, I had to pay the fine because he explained it – in the spirit of the law its right and in the letter of the law it's wrong. So I had to pay the fine and then I had to – I am half way down the street and around the corner before I realized that I did pay the fine, I did have to pay him for his time and I didn't get out of anything and yet I feel good about it.

That's the way the Libra works.

Just like okay – wait a minute, how does this work, how did you do that. They have a way of bending reality a little bit, they make it sound good.

I want a Libra to run my business, I want a Libra in charge of my business, I want a Libra, they are really good at

management, they will also make sure that they will give 110 percent to make sure everybody is happy in the office. And that works real well.

They are always well-appointed. That is one of the things I learned. I have dated a couple of Libras, not just my wife, but a couple of them and one of them was great because she would leave her house and she would look appropriate – well dressed, but appropriately casual and her place would be a wreck because she had to sort through all the clothes on just the right thing to wear.

You have to have the right t-shirt to accentuate the girl things and all that sort of stuff, it has to be just perfect. Libras are like that.

Now, when Libras come up against brick walls what are they going to do? They are going to stand there, one foot and try and make it to the other side – oh but there's a wall here. Maybe it's protecting us from something, and to this day they are still sitting there trying to make up their mind.

One of the things you can do to really put a Libra on the spot is its black or white, no kind of gray area – it's on or it's off, that's sort of in the middle. It's one or a zero. Can't it be like a half. They can't make up their minds.

## Scorpio

Next sign, one of my favorite signs, the Scorpio. Now I have dated Scorpions and I have dated Libras and they are two of the most manipulative signs in the zodiac. You learn to work with this, they go about their manipulation in a very different way. Alright, and when I say manipulative – manipulation is not always bad.

Teachers are manipulators. Med physicians are manipulators. Our therapists and psycho analysts are all going to be manipulators, so we always get manipulated whether we want to be or not. So when I say manipulate, it's not always bad.

I will get done working in a psychic fair, on a Saturday and I will be starving, I hadn't eaten all day, I had a power bar and a coffee so I am really hungry. I go to my Libra date, out to eat after we finally decide whether it's going to be TexMex or BBQ. I will go with my Libra date and she'll say ... they will serve me dinner, they will stick my plate down in front of me and my Libra date will go, I know you won't mind me having a bite off your plate.

Now it sounds like a question, it's actually a direct verbal command. But then they will sit there and look cute, and what are you going to do, say no to them?

Scorpio is going to be completely different, same scenario. Worked all day, hungry and I sit down, they put food in front of

me and the Scorpio goes what was that – and I go, what. I look back where'd my dinner go. Very different ways at arriving at the same conclusion.

Scorpios planet is Mars. It's associated with the eighth house. Scorpio is also a water sign and it's a fixed sign. I have one word of advice for Scorpio – don't cross them ever. Don't piss them off. I have only pissed one off so far and the wounds have yet to heal.

I still have the big gaping bloody wounds on my back from the claw marks. You know when Scorpios let go of something – when it's dead and starts smelling, and even then sometimes they hold on just a little bit longer. It's not dead yet.

You see, if I kick it, it moves so they keep going. Just don't cross a Scorpio, if you have a Scorpio as a friend, you have a friend for life.

We were working a psychic fair one time, it was kind of slow, I had a Scorpio on one side and my little girls, who actually were bored. She was sitting there going okay, you and him were both brothers in the Civil War. In a past life we were brothers. I said what color uniform did I have on, she said gray. What color uniform did he have on – gray.

Then as we get into the story a little bit, the narrative, it turns out I shot him twice, with a single shot rifle, I'm sure it was an accident, Civil War. And to this day, whenever I see this guy he

reminds me I've got the gun this time buddy. Can we let go of this stuff at all – apparently not. They don't seem to be able to let go of anything, you just want to remember that.

I don't even know if this past life stuff is true or not, but he is still holding onto that. That is one of the things you should watch out for.

We are going to go back to the beach, remember all that nice soft sand down there, on the beach, all that soft sand is a great big rock where the water worked on it repeatedly over eons of time until they ground it down. And that is what happens with Scorpio. Cross them and they will work on you until they grind you down. They win. They will win at all costs, too. They will patiently wait several years to make sure that justice is served.

It looked a lot like revenge to me, but it was just making sure that justice was served – yeah right.

Scorpios are easy to work with once you know they are a Scorpio, you just pretend to do what they say, so you can get away from them and you don't cross them. The planet that is associated with Scorpio is going to be Pluto. Pluto wasn't discovered until 1930 and coincidental with Pluto we had the rise of fascists in Europe, and we also had the invention of the atomic bomb, we discovered what a big problem that is.

And Plutonium is a very Scorpio type energy. They can be really dangerous or really useful it depends on how you use it.

When Scorpios come up against a brick wall, what they are going to do is they are going to go down here to the corner to the 7-11 and they are going to steal plastic spoon, they are not going to buy or borrow, they are going to get one of those little plastic spoons they use for coffee and they are going to come back and they are dig a tunnel underneath that brick wall.

They are not going to tell you anything until they have come out on the other side, and then they are going to tell you how they did it all by themselves without any help from anybody. That one just drives me crazy about the Scorpio – I did it without any help from anybody.

## Sagittarius

The next sign we come to is Sagittarius. Sagittarius is a mutable sign, it is a fire sign, not quite like a Gemini, but we are right up there and our planet is Jupiter. Jupiter is a gas giant. If you are standing outside the solar system looking in, Jupiter has an internal core that is hot and burns in and out of itself, and because of that it looks almost like a second sun. It looks like a second small sun right next to our sun.

We burn quite brightly, okay. Our symbol is a little arrow pointing up. When I draw it, I point it as an arrow pointing up and part my signature down – do a little arrow underneath my name.

What that is it's the archer's arrow, it's the sentar. I always point out that Sagittarius, our symbol is sentar which is half man, half horse's ass. It is perfect for us, okay.

A lot of the astrology books say that you are a graceful son, you make a great ballerina. Yeah if you don't mind falling on your face occasionally, we are klutzes, we are very-very clumsy. It's not a bad thing, it's just the way it is.

I have unidentified bruises on my legs, where I ran into something I guess, I don't know. That is one of the things that happen with us, you have to remember we are also lucky. We don't have luck necessarily in the area where we want it – but we always seem to come out scot free.

One of the things that happened with my wife, we went gambling down at the coast here and she's going hmm – 7, 7, 7 and the machine lit up and she said what does that mean? It means that you just won, let me see figure that out, you just won \$1200 you paid for our weekend. Then she took me to Vegas. So it's not all bad, but I didn't get lucky but she did.

She won the machine, that is the sort of thing that happens with us, we are always around when it happens.

One of the ways I like talking about Sagittarius is one of my favorite ways and there is only one Sagittarius girl who would dispute this – if I gave you a choice between a book or lunch she would go for the book. Alright, because that – we like knowledge, always thirsty for things that will feed our brain, that's the good news.

Sort of a short attention span, a little ADD at times, but we are still thirsty for things that feed our brain. Do you have a Smartphone ... that's the way we are. You can look stuff up on it now. That's what makes it so easy, I can look up. I have Wikipedia, which isn't necessarily reliable, but it gives me a general direction to go. I can get fast information.

One of the things that's nice about being Sagittarius, we are walking compendium. Sometimes useless facts. That's the way it goes right.

Sagittarius is known for its love of travel, I will vouch for that. One of the things, I didn't set out, it wasn't one of my intentional parameters as far as I know when I set out on this business, to travel around Texas. But I discovered that is what I really like doing.

I travel nationwide and I prefer traveling in Texas, because people – he's from Austin, oh that's okay then he's not weird. They don't think you're weird if you are from Austin or any place else.

Now, Sagittarius. Our planet is Jupiter, we are lucky ones, rub our belly we will make you lucky if you take us to the casino. And we like the higher mind. If you want to catch one of us, get us on a higher mind, a philosophical ramp of some kind. A little philosophy, a little physics something like that, we can take off and run with it.

One of the biggest problems you have with us, once we start ranting and raving on a particular topic, sometimes we don't shut up. Now I got web logged and I am really glad I have that, because occasionally I will get on a terror and I can spew forth a decree of a typical type and it gives me a voice some place. It gives me a chance to express myself.

It's important that Sagittarius has expression somewhere. When we get talking though, sometimes you can't get us to shut up, that's just one of the problems with being a Sagittarius.

Now, when we come up against a brick wall, remember the symbol for us is that little arrow, we go right over that brick wall. We will probably trip on it as we go over, but we will go right over saying I don't see a problem here. Fall flat on our face on the other side, that's the way it goes.

## Capricorn

The next sign we come to is going to be Capricorn.

The next sign we come to is going to be Capricorn. Capricorn starts on the shortest day of the year. The symbol, the way I draw Capricorn is a little loop, it looks like an R with a little extra loop in it. What that is supposed to be is a sea goat.

Typically the mountain goat is one of the symbols for them. I like the guy who did my business card, because in it there is a little Capricorn sitting with the symbol in it, but it's in reverse and it's a fairly typical Capricorn looking at it.

He said oh I put that in there, I can take it out, I'm sorry I don't know what happened. It's your pen buddy, don't take it out, leave it, it looks good. It makes for a good story. He's the artist, he incorporated that.

More comedians are Capricorn than any other sign. When I look at long-standing comedians, people like Johnny Carson – he's got Saturn smack dab in the middle of his first house. He had to do comedy, he has a Capricorn flavor to him.

The planet that is associated with Capricorn is going to be Saturn. Saturn goes around the sun every 28 years. Perhaps you have heard me talk about Saturn, you have heard me talk about Saturn returns. There was a Greek astronomer, that is back when astrology and astronomy were the same thing, a Greek

astronomer said Saturn is easy to predict by, you just predict bad stuff. It happens, okay.

Saturn is a task master. In Capricorns, Saturn is all the way around their chart, until they are 28 years old they are just a pain in the ass. I don't have a polite way to put it, they are just particularly difficult. They sound just like Eeyore. Oh no good is going to come of this, and it's like we shouldn't do that. They are in the background going this isn't good – you just want to [slap] shut up. Unfortunately I can't get them to shut up.

Once you understand you are dealing with a Capricorn though, they are easier to get along with.

I spent part of my afternoon in mediation and it's one of those things, we had a Capricorn lawyer and he was a really nice guy and he was funny to the bone, okay. The other part he came back with one of those astronomical figures of a settlement counter offer. It was so ridiculous it was laughable. And he looked at me completely dead, he said we're lawyers we are always asking for way more than we're worth.

It was refreshingly honest and the way he put it, it was also funny, he made the whole situation palatable.

Capricorns, after they get to the age of 30, after they have ridden Saturn all the way through, they develop an obtuse sense of humor. It's not like I got a lot of room to move on this weird

sense of humor thing myself, they got this absolutely bizarre sense of humor and they do things differently.

They think a little bit different.

Saturn is a driving planet, the symbol for Saturn is an H with a cross on it. That is the symbol of Chronos, Chronos is only made itself. Chronos has made it so far into modern nephrology, you know we have at the New Year, comes when the sun is in Capricorn.

As a matter of fact, the New Year we have the baby and the old man that has the time thing. The sands of time, but they use to show the Messiah, and that's what Saturn does, it removes things form our life that no longer belong there.

That is one thing that is important to remember with Saturn, when we come up on Saturn stuff. Between the ages of 28 and 30 we have all had our Saturn return and we are doing something in our life that we didn't belong doing, and you're Sagittarius I'm Sagittarius, it was probably ripped from our hands in a not too pleasant manner, but it's fun.

That's my reaction to Saturn. There's one sign that does well with Saturn, with Saturn returns and that is Capricorn because that's their planet. It's like I'm in my element now.

I used to do a lot of what I call divorce readings and that is where I would look at somebody's chart and they would tell me

that between the ages of 27 and 30 they'd be getting their first divorce – the first one is always the hardest. They'd be getting their first divorce and they'd be going what's going on. It's a Saturn returned divorce, they realized this relationship they started when they were 21 isn't working anymore. Time to get out.

Remember the movie the Seven Year Itch with Marilyn Monroe. It was on stage before that as a play. The Seven Year Itch is about Saturn, because every seven years Saturn – you take 28 and divide it into four, every seven years Saturn is going to do something to you and it's – Saturn checks in to see how are you doing?

He knocks on the door and says are doing okay, just checking. I have an uncle who's a Capricorn, I have actually heard him say this – it's more important to look good than to feel good and he meant it. It was ironic at the same time.

When Capricorns come up against brick walls, what they are going to do is they are going to stand and worry it apart. They are just – it will drive you crazy when you are doing this stuff, because this brick wall is here what are we going to do. If they stand there long enough, probably 28 years, and it will come to pieces. Capricorns live long chronic lives, they always seem to have some sort of a problem. It doesn't matter what it is, there's always something wrong.

Like I said Eeyore is a perfect example of that.

## Aquarius

The next sign we are going to come to is going to be Aquarius. Love me my Aquarians. I had another lawyer here in town who's an Aquarius, probably one of the most brilliant ones I have ever talked to and she always sounds like she's a summer.

What it is, Aquarius is an air sign, it's associated with the eleventh house and it's a fixed sign. It's also the sign of rebel. The Aquarius will sit there and you can see the wheels turning as she is analyzing stuff.

A planet for Aquarius is Uranus, which is very important to understand because it's different. Once you understand astronomy here, it makes it a whole lot easier. With Uranus, the north pole, Uranus points at the sun at all times, with the north pole Uranus pointing at the sun, its 90 degrees off from everything else. And you will find Aquarians are about 90 degrees off. Not 180 not 360, 90 degrees off.

If you look up the astronomy, it's actually 87 degrees, not 90 and it flips over every 42 years. But basically its 90 degrees off and once you get your grip on the 90 degrees off, the Aquarians suddenly start to fall into place and make sense.

The Aquarians, they can run ramped in places like Austin. They are not going to raise an eyebrow, they are weird but how is that going to show up here.

I also have a very typical Aquarian couple out in west Texas, unlike anybody else, they have been married to the same people for close to 50 years now. In west Texas that is very unusual and they are still happily together. Which goes against the norm. I got another Aquarian out there, a little church going girl and once again, she – her rebellious side is she sticks to the straight and narrow which is completely uncharacteristic of anybody else around her.

That is why I like the Aquarians, they are one step different, not bad just different. An Aquarian if you can catch their brain – I had a brief liaison with this one Aquarius, it was great fun. She calls me up says I'm moving ... where you moving ... Colorado. So you are moving further away, hey that works for me. That's the way, they don't want to get too close. They are very humanitarian.

The eleventh house is all about how we construct ourselves in the world. One of the old ways they used to talk about it, this is your group of friends that you hang around with.

It's how we express ourselves in community as an example. Aquarians are really easy to get along with once you understand that they are a little bit different. Sometimes, one of the best ways to describe the Aquarius is how do you feel about that. I will ask an Aquarius and they will go well, how do you think I feel. I didn't ask you what you thought, I asked you how you felt.

Well let me think about it and I will tell you how I feel, they have to stop and analyze. When you are dealing with somebody and you realize they are an eleventh house grouping or they have, they are an Aquarius, I go okay I know what I am dealing with. When they think they feel, that is how they work. You work with what it is they – you work within their parameters and it makes it a whole lot easier to get along with them, if you understand they respond a little differently.

Gemini's, to a lesser extent Libras, Gemini's and Aquarius are the two intellectual signs. If you can catch their brain, they will do anything. And I mean anything.

Aquarians, when they come up against brick walls. Remember they are an air sign, remember they are rebellious, they are naturally rebellious. So what we are going to do is whip out a can of spray paint and leave a nasty message, grammatically correct, anatomically impossible and they are going to get bored, walk off and do something else because there is a brick wall there and they are not going to hurt themselves trying to get through it.

## **Pisces**

The last sign we are going to do right now is going to be Pisces. My first wife was a Pisces. I think they are all cheating and hideous. Anyway, I am not particularly fond of Pisces women, but that would once again, has to do with my own background than anything else.

I hope this isn't on the internet. Be careful what you say.

Pisces is associated with the twelfth house. Now in traditional astrology, the sixth house is going to be physical health that is the Virgo house. In the twelfth house, it's going to be mental health. In old fashioned astrology, they also called the twelfth house the house of secret enemies.

If you find three planets or more in the twelfth house you are going to do jail time. I have at least three planets in my twelfth house, and yes I have done jail time. But it was overnight once and just a couple of afternoons. Not like it was any extended length of time that I was in there.

I am old enough and mature enough now to say I earned those visits, okay. I have since learned from my wrongs so it doesn't matter.

Anyway, it doesn't necessarily have to be a jail in the strictest sense, it can also be, we do something where we put jail in our

own mind. We create bars on the windows that may not even be there.

The twelfth house is the subconscious, the sixth house is physical health the twelfth house is mental health. We have discovered most of our stuff comes from our subconscious. It's how we talk to ourselves and how we deal with each other. And that starts in your twelfth house.

Pisces, it's a water house, it's the most empathic. If you go around the room in one of the metaphysical expos, what you are going to find is most of the readers have a lot of Pisces in them.

Pisces Moon, Pisces Rising – one of the problems with Pisces, it's the sign of the Victim. I don't mean that they are all victims, there are some. They have to be great healers, if they are not working in the healing arts, they usually wind up being very uncomfortable.

One of my associates has had chronic illness after chronic illness after chronic illness until she started working as a healer and a reader. Once she started doing that, it's like all this stuff went away and she felt much better.

Once you start doing what you are supposed to do, it gets better.

Pisces have got this tremendous healing ability, they have to do something with it. It's a matter of finding the right outlet of them.

Pisces are wonderful lovers, that's the good news. They have no boundaries, that's even better news. One of the problems with Pisces, if I were to take a Pisces right now and just drop her right here, she would just sit there and float unless you wanted them to fall to the ground.

Okay, and then she would land catlike on her feet. There's rules, basic rules that govern eleven of the signs, and Pisces don't feel like the rules apply to them.

The law of gravity, 9.8 meters per second squared, works for all of us, doesn't always work for them. So they just go walking on the water, you know. Walking on air, quite literally.

Pisces, there are two places you will find Pisces most frequently – one is going to be in the clergy which is obvious because it's a very spiritual sign and the other place you might find them is going to be in the military. You go military – how do you get that?

They are, both places they are told where to go, what to do and what to wear, and Pisces like that, they like being told. They are not, sometimes you have to spell it out for them and once you do, they are like okay that is what I am supposed to do.

Pisces make wonderful mothers, their planet is Neptune. Neptune is another one of those gases we don't know much about. It's the mysteries of the sea and when you are dealing with the Pisces you are dealing with mysteries of the seas.

Remember I said, we've got – they don't always obey natural laws and when they come up against brick walls, what they are going to do is they are going to transmogrify right through. I had one Pisces literally tell me, yeah sure. You just sort of fit between the atoms. How do you do that, because I am a Sagittarius and I go smack right into the wall and it hurts.

We've got a start – we've got a basis to begin with.
